Hannah Lindqvist
Senior Grid Modernization & Power Electronics Engineer
Email: hannah.lindqvist@nordicgrid.org | Phone: +46 8 123 4567 | Stockholm, Sweden | GitHub: hlindqvist-grid

SUMMARY
Power systems engineer with 6.0 years of experience designing utility-scale grid interconnects, HVDC converter topologies,
and battery energy storage system (BESS) dispatch algorithms for high-renewable penetration electrical networks.

TECHNICAL SKILLS
Skills: MATLAB/Simulink, PSCAD, Power System Modeling, High Voltage DC (HVDC), Battery Energy Storage Systems (BESS), SCADA, IEC 61850, Python, Grid-Forming Inverters

PROFESSIONAL EXPERIENCE
Senior Power Systems Engineer | Vattenfall Grid Solutions 2022 - Present
? Modeled dynamic grid stability for 1.2GW offshore wind farms using EMT simulations in PSCAD and MATLAB.
? Implemented synthetic inertia control strategies for grid-forming inverters during sub-synchronous frequency drops.
? Designed automated IEC 61850 substation telemetry interfaces integrating RTUs and regional SCADA control rooms.

Grid Integration Engineer | ABB Energy Industries 2020 - 2022
? Validated high-voltage DC (HVDC) Light converter stations interconnecting Swedish and Danish national power grids.
? Built Python automation suites analyzing transmission fault ride-through compliance across European ENTSO-E grid codes.

EDUCATION & HONORS
Education: M.Sc. in Electric Power Engineering ? KTH Royal Institute of Technology (2020)
Education: B.Sc. in Electrical Engineering ? Chalmers University of Technology (2018)
Certifications: CIGRE Member | IEEE Power & Energy Society Certified Professional

Years of Experience: 6.0
